

ORIGINAL PINE-SOL MULTI-SURFACE CLEANER KILLS 99.9% OF GERMS,¹ INCLUDING COVID-19² VIRUS

Original Pine-Sol® Multi-Surface Cleaner received approval from the Environmental Protection Agency (EPA) for kill claims against SARS-CoV-2, the virus that causes COVID-19. The new claims come after third-party laboratory testing that proved the disinfectant's efficacy against the virus when used as directed on hard, nonporous surfaces.

Remember, in order to disinfect against viruses and bacteria you must use Original Pine-Sol® at full strength (in its concentrated form).

1 Kills Salmonella enterica, Staphylococcus aureus and Influenza A virus when used as directed.

2 Kills SARS-CoV-2 on hard, nonporous surfaces when used as directed. Use as directed for other germs.

CLEANING VS. SANITIZING VS. DISINFECTING

CLEANING removes dust, debris and dirt from a surface by scrubbing, washing and rinsing.

SANITIZING reduces the bacteria identified on the product's label on surfaces and in laundry.

DISINFECTING destroys or inactivates both the bacteria and the viruses identified on the product's label (like Influenza A and SARS-CoV-2, the virus that causes COVID-19) on hard, nonporous surfaces.

STEPS TO DISINFECT SURFACES WITH ORIGINAL PINE-SOL®

To disinfect against SARS-Cov-2, the novel coronavirus that causes COVID-19:

Pour full-strength (undiluted) Original Pine-Sol® onto a clean cloth or sponge.

Apply to wet the hard, nonporous surface and let stand for 10 minutes.

Rinse with fresh, clean water. For visibly soiled surfaces, remove excess dirt first.

Always follow the product's label instructions for proper usage and dosing instructions. For more information on COVID-19, refer to the [CDC's website](https://www.cdc.gov). To learn more about disinfecting with Pine-Sol, visit [PineSol.com](https://www.PineSol.com).
